

October 30, 2020

My name is Jodi Behan, and I live in Clarksburg.

Here are my Concerns & reasons to dispute this bylaw;

- 1- there is no science to warrant mask wearing. Only proof that masks do not prevent the spread of aerosolized spread of a cough, or sneeze.
- 2- this is discriminatory against those who cannot wear masks for health and emotional reasons. That is there choice. Basic human rights.
- 3- there is no prevention of a virus when people's circles are interlocking.
- 4- people are touching their masks and faces, so they are devoid of their purpose.
- 5- children should not be wearing masks, especially when they are running around in gym class or at recess or outdoors. They should breath fresh air.
- 6- do we know whether it is safe and healthy to breathe with a mask on
- 7- we have 0 cases in Collingwood and surrounding areas and people in slews have been coming up here since the first lockdown and moved up here since and nothing
- 8- numbers were going down, before you mandated mask wearing.

Thank you for your time & consideration.

Jodi Behan
