Subject: Fw: Attainable Housing and future building in the Town Of The Blue Mountains

Mayor Soever, Council, Municipal Clerk Corrina Giles, Sustainability Advisory Committee,  
Economic Advisory Committee, Attainable Housing Corporation

When the municipal Town Hall was constructed the Council of the day decided to build it to the  
Gold Leeds Standard of the Canada Green Building Council.

Knowing what we know today regarding the clear need for climate change action, would it be  
too lofty of a goal to strive to achieve a Platinum rating on the new municipal attainable  
housing Gateway building?

At the same time , would Council commit to having all future public structures and buildings  
built to a minimum Leeds Gold Standard and develop policies that enshrine Leeds Certification  
into the future attainable housing builds and all future public structures and find means to  
encourage privately-owned public building within the Town of The Blue Mountains to meet the  
minimum Leeds Standard? While at the same time maintaining our current municipal zoning  
and by -laws, plus present Ontario provincial policy statements

Sincerely

Alex Maxwell.
