Subject: Fw: Ideas for the Municipal Golf Course

May I have this on the council agenda and circulated to the committees.

Thank you

Alex Maxwell

Mayor Soever, Council, Corina Giles, Clerk, Shawn Everett, COA, Rayan Gibbons Director of Community Services, Economic Development Committee, Leisure Activities Committee and Staff of the Town of The Blue Mountains.

The topic of our municipal golf course, Tomahawk, arises regularly and while principally focused on the relationship between the municipal taxpayer and this municipal asset. Each time the subject seems to be put to rest by an increase in fees and some additional surveillance. Some golfers of the course are aware of many social and financial possibilities that present themselves as they walk the course.

Why wouldn't taxpayers benefit through repurposing, increased programming and community partnering at our municipal golf course?

On the subject of community partners, why not allow our service clubs and other organizations which provide prosocial benefits to local citizens to use the municipal course for fundraising? Allow local business to rent the course for events.

Perhaps the local schools could use the course for recreational and educational school outings ranging from sporting activities including golf to environmental studies at one of the ponds.

I am confident that many other ideas could be contributed, perhaps by the committees, to increase use of Tomahawk and thus its value and benefits to local taxpayers.

Sincerely

Alex Maxwell
