Subject: For Council Consideration --Re : TBM Forcemain Project

As a resident at [REDACTED], I want to express my concerns over the unanticipated and extremely large increase in the budget for the TBM Force main Project .

Over the last few years I have been involved with the residents on our street and working with the Town on a number of issue with the hopes of reaching a reasonable consensus that would respect the character of the Town while pursuing growth that would be in a manner to protect the public interest .

At this juncture , with the enormous increase in costs , and the slower growth that is anticipated within the Town it is respectfully requested that the Town not approve the report but in stead request a report back to Council examining the actual capacity required , the impact of the increase on the financial impact to the Town (including the impact on its reserves) and finally to determine if modifications should be made to the current proposal to ensure the most cost effective route and size of the components are in place .

It is hard to imagine the public would maintain its confidence in the process without taking the necessary steps to ensure The Town takes these steps to respect its fiduciary duty to the public

Thank you for your consideration
Stephen Diamond
