Bay Street East Reconstruction Project Update | May 4-8, 2026

Arnott Construction remains focused on installation of the new underground utilities between McAuley Street and Elgin Street. This work will require some temporary interruptions to driveway access as the excavation progresses. Arnott staff will deliver notices to impacted properties the day before access is limited. Elsewhere in the project area, reclamation work has begun between Mill Street and McAuley Street, and Epcor is continuing work in the area between Elgin Street and Grey Street to install utilities in the conduits installed across the road.

A reminder that the previously planned overnight work at the intersection of Grey Street and Highway 26 that was scheduled for early May has been deferred until after the Labour Day long weekend. An update will be made once new dates are finalized for this work.
