- 10/2 Mbps
- 5/1 Mbps
- <5/1 Mbps

☑ Display these technologies:

○ Wireline only
◉ Wireless only
○ Wireline and Wireless

Conclusions and Recommendations

- Most areas need upgraded services.

- Existing funding is insufficient and will take too long.

- Consider Private Equity Funding for PPP.

- A strategic approach is needed.

- A partner not-for-profit firm offering turnkey Internet solutions should be partnered with to execute your upgraded Internet.

- i-Valley (previously introduced) highly recommended.

- Local ISPs would be included and are essential.
