How can we help you?

Safety Concern. I live at [REDACTED] Mill Street, which is next to the Town Hall. I have noticed repeatedly that people park their cars very close to our driveway, making it difficult to get out. Many of those cars are owned by people working or visiting the Town Hall. Also this week I notice people parking their cars on BOTH side of Mill Street, making it only a one lane for people driving up and down, plus almost impossible for us to pull out of our driveway. Snow is coming, and with snowbanks it makes it difficult for the two house using the driveway plus our neighbours, to pull out. Ask your employees to be aware of this and be courteous.

REQUEST. Please post NO PARKING Signs on ONE side of the Mill Street road, I recognized it is too much to have no parking on both sides. Please post NO PARKING close to our driveway, where the bus stops and the fire hydrant and driveways interfaces.

Subject: RE: Transportation Committee Re Correspondence

Thank you. FYI, yesterday cars were parking on both side of the street. Hard to make sure traffic can flow both ways, when there is barely room for one car. Big trucks cannot pass through to the pump station etc, when vehicles are parked on both side of the street. Request is no parking on one side, and also in front of the fire hydrant and beside my driveway, cant see past the big SUV vehicles when they park.

Thanks. I am glad you included Rob Sampson.
